USSR HEAVY MACHINERY PRODUCTION DATA

TEN-YEAR PERIOD SEES OUTPUT DOUBLED -- Moscow, Voprosy Ekonomiki, Jan 53

The 1950 USSR production of machinery was 2.3 times the 1940 total. Production of metallurgical equipment was 4.8 times as great; of steam turbines, 2.6 times as great; of electrical equipment and of petroleum extracting and processing equipment, three times as great.

MINISTRY OUTSTRIPS 1940 RECORDS -- Leningradskaya Pravda, 23 Dec 52

The 1951 production of metallurgical equipment by plants of the Ministry of Heavy Machine Building was 3.4 times as great as the 1940 production; steam turbine production was 3.2 times as great, boiler production 4.7 times as great, and crane production 3.3 times as great.

STEAM TURBINE OUTPUT INCREASES SIXFOLD -- Leningradskaya Pravda, 28 Oct 52

The 1951 production of steam turbines was 6.4 times that of 1948; production of hydroturbines was twice as great, and of diesels, five times as great.

LENINGRAD BOOSTS CONTRIBUTION -- Leningradskaya Pravda, 28 Sep 52

In 1951, Leningrad industry produced 1.8 times as many hydroturbines as in 1948, 3.5 times as many turbogenerators, and 5.7 times as many diesels.

KAZAKH SSR PLANTS MEET PLAN -- Alma-Ata, Kazakhstanskaya Pravda, 21 Sep 52

During the past Five-Year Plan, machine-building enterprises of the Kazakh SSR met their plans for labor productivity 100.5 percent. Ten plants of the republic have run on a profit basis during the current year.

PLEDGE METAL SAVINGS FOR 1953 -- Moscow, Pravda, 15 Dec 52

The 1953 plan for the Sverdlovsk Uralmash Plant specifies a 24.2 percent increase in the production of metal-rolling equipment, a 20.6 percent increase in the production of petroleum drilling equipment, and a 16.6 percent increase in the production of agglomerating equipment. The forge shop has pledged a year's saving of 600 tons of metal and 350 tons of fuel.

METAL SAVING EFFORTS FALL SHORT -- Moscow, Moskovskaya Pravda, 11 Feb 53

During 1952, designers at the Elektrostal' Novo-Kramatorskiy Plant altered plans for the manufacture of various products to a degree which should have netted the plant a saving of over 250 tons of metal. The management failed to follow through completely with these plans, however, and only 185 tons of metal were saved.

For 1953, the plant has pledged to save 500 tons of metal by reducing the weight of its new machines.
